## Education

Master of Software System Engineering - UTS August 2023 --- June 2025
Master of Project Management - USYD February 2022 –June 2023
Bachelor of Finance - Hebei University September 2016 --- July 2020

## Work Experience

### Investment Banking Department — CITIC Securities --- Beijing, China

September 2020 to December 2020

- Participated in the initial work of IPO projects of **5 companies** during the internship. Including an **automotive intelligent driving and car networking** company - Jing Wei Heng Run 688326.SH.
- Proficiently utilized **PowerBI** to analyse financial data for companies.
- Demonstrated exceptional **writing skills** by assisting in the creation of **4 company prospectuses**, organizing more than **10 meeting notes**, and actively participating in **3 business negotiations**, resulting in a substantial improvement in work efficiency. Acquired a comprehensive understanding of fundamental working methods and processes in finance, legal, and business domains.
- Displayed a strong aptitude for **quick learning** through active involvement in IPO projects.

### Agile Project Manager — Yeahmobi --- Beijing, China

May 2021 to August 2021

- Successfully implemented Agile management principles by leading **sprint planning sessions** and **conducting team stand-ups.**
- Utilized software tools like **Jira** and **MS Project** to effectively manage projects, ensuring seamless communication with over **20 stakeholders** and maintaining satisfactory project progress.
- Proactively addressed stakeholder demands, coordinating and resolving them in a timely manner, resulting in the daily deployment of **100+** advertising products.
- Supported department heads in project management, overseeing the iterative development process of advertising products, and driving **R&D iterations within budget, schedule, and quality constraints**.
- Ensured adherence to Agile practices within the company by facilitating project delivery, leading to a **weekly team turnover of $50,000.**

### Research Assistant — UNSW--- NSW, Australia

June 2023 to November 2023

- Analyse the Data from the 45 and Up Study. Using **Python** to do the data pre-processing (On going).
- To conduct precise dietary risk prediction of cardiovascular events using **decision tree** in the presence of imperfect data (Prepare Stage).
- Tools like the **SHAP** (SHapley Additive exPlanations) framework will be used for visualizing and improving model interpretability. Ranking important features helps identify CVD risks and support accurate risk prediction. (Prepare Stage).
- Develop a user-friendly **software (mobile APP)** to guide consumers to predict their cardiovascular risk based on their own diet (or if they change their diet) (Prepare Stage).

## Project Experience

### Research on the Transformation of Profit Model of China's Third-party Payment Platform

- Conducted analysis on challenges and solutions for traditional finance companies transitioning towards **fintech** and identified issues in **payment platforms**.
- Utilized **Fine BI** to analyse and visually present data on companies in the **fintech industry**.
- Found that Chinese financial enterprises have limited tech application and **less than 20%** utilize blockchain, big data technology, highlighting the need for improved platform security.
- Plan to continue researching integration of **big data technology** to enhance payment platform security.

### Utilizing Machine Learning Techniques to Forecast Stock Market Trends

- Specifically demonstrated through my experience in **predicting S&P 500** index prices.
- Skilled in data processing with **pandas**. Trained a **random forest model** using data from 2022-01-01 to make accurate predictions through back testing.
- Through the addition of predictors and careful avoidance of overfitting, I successfully improved the precision score **from 0.36 to 0.58**.

## Certificate

Candidate of PMP (Project Management Professional) Certification of IBM data Scientist (Online Course, IBM)

## Skills

Java, Python, HTML, CSS, Jira, MS Project, Machine Learning, Power BI, Fine BI, Microsoft office
